

Manufacturing & Industrial Flooring

In manufacturing and industrial facilities, you have professionals doing heavy duty work with heavy duty equipment. Safety issues are paramount, and strength is essential. Most industrial and manufacturing buildings utilize concrete floors for this reason. Allegheny Installations makes epoxy and polished concrete floors that are strong, but still sleek, and can promote safe conditions for workers.

Modern Industrial Floors

Allegheny Installations designs and installs floors with the latest flooring products and materials, ensuring that you get the highest quality floor on the market. We pour a seamless floor on-site, on-budget, and on-schedule, because your business can't afford to fall behind.

When you pick an epoxy coated concrete floor, it is designed for heavy use. They can be thermal resistant (up to 225 degrees), non-porous to protect from damaging liquids, and can be cleaned easily. You're trying to increase productivity, don't let your floor drag you down.

What You Can Expect from Allegheny Installations:

When you hire Allegheny Installations, you are hiring decades of flooring expertise and customer service, specifically in epoxy, terrazzo and polished concrete floors. We have a wealth of customization options at our disposal – when we say that our floors are custom designed, we mean it. Your floor will be a one-of-a-kind, produced for both your functional and aesthetic needs.
